PROBLEM STATEMENT

In this advanced round, we call upon the first round winners and other top participants to develop an even more advanced technology that can swiftly and precisely detect driver drowsiness or unease. The aim remains the creation of a system that can be integrated into vehicles for a substantial enhancement in road safety.

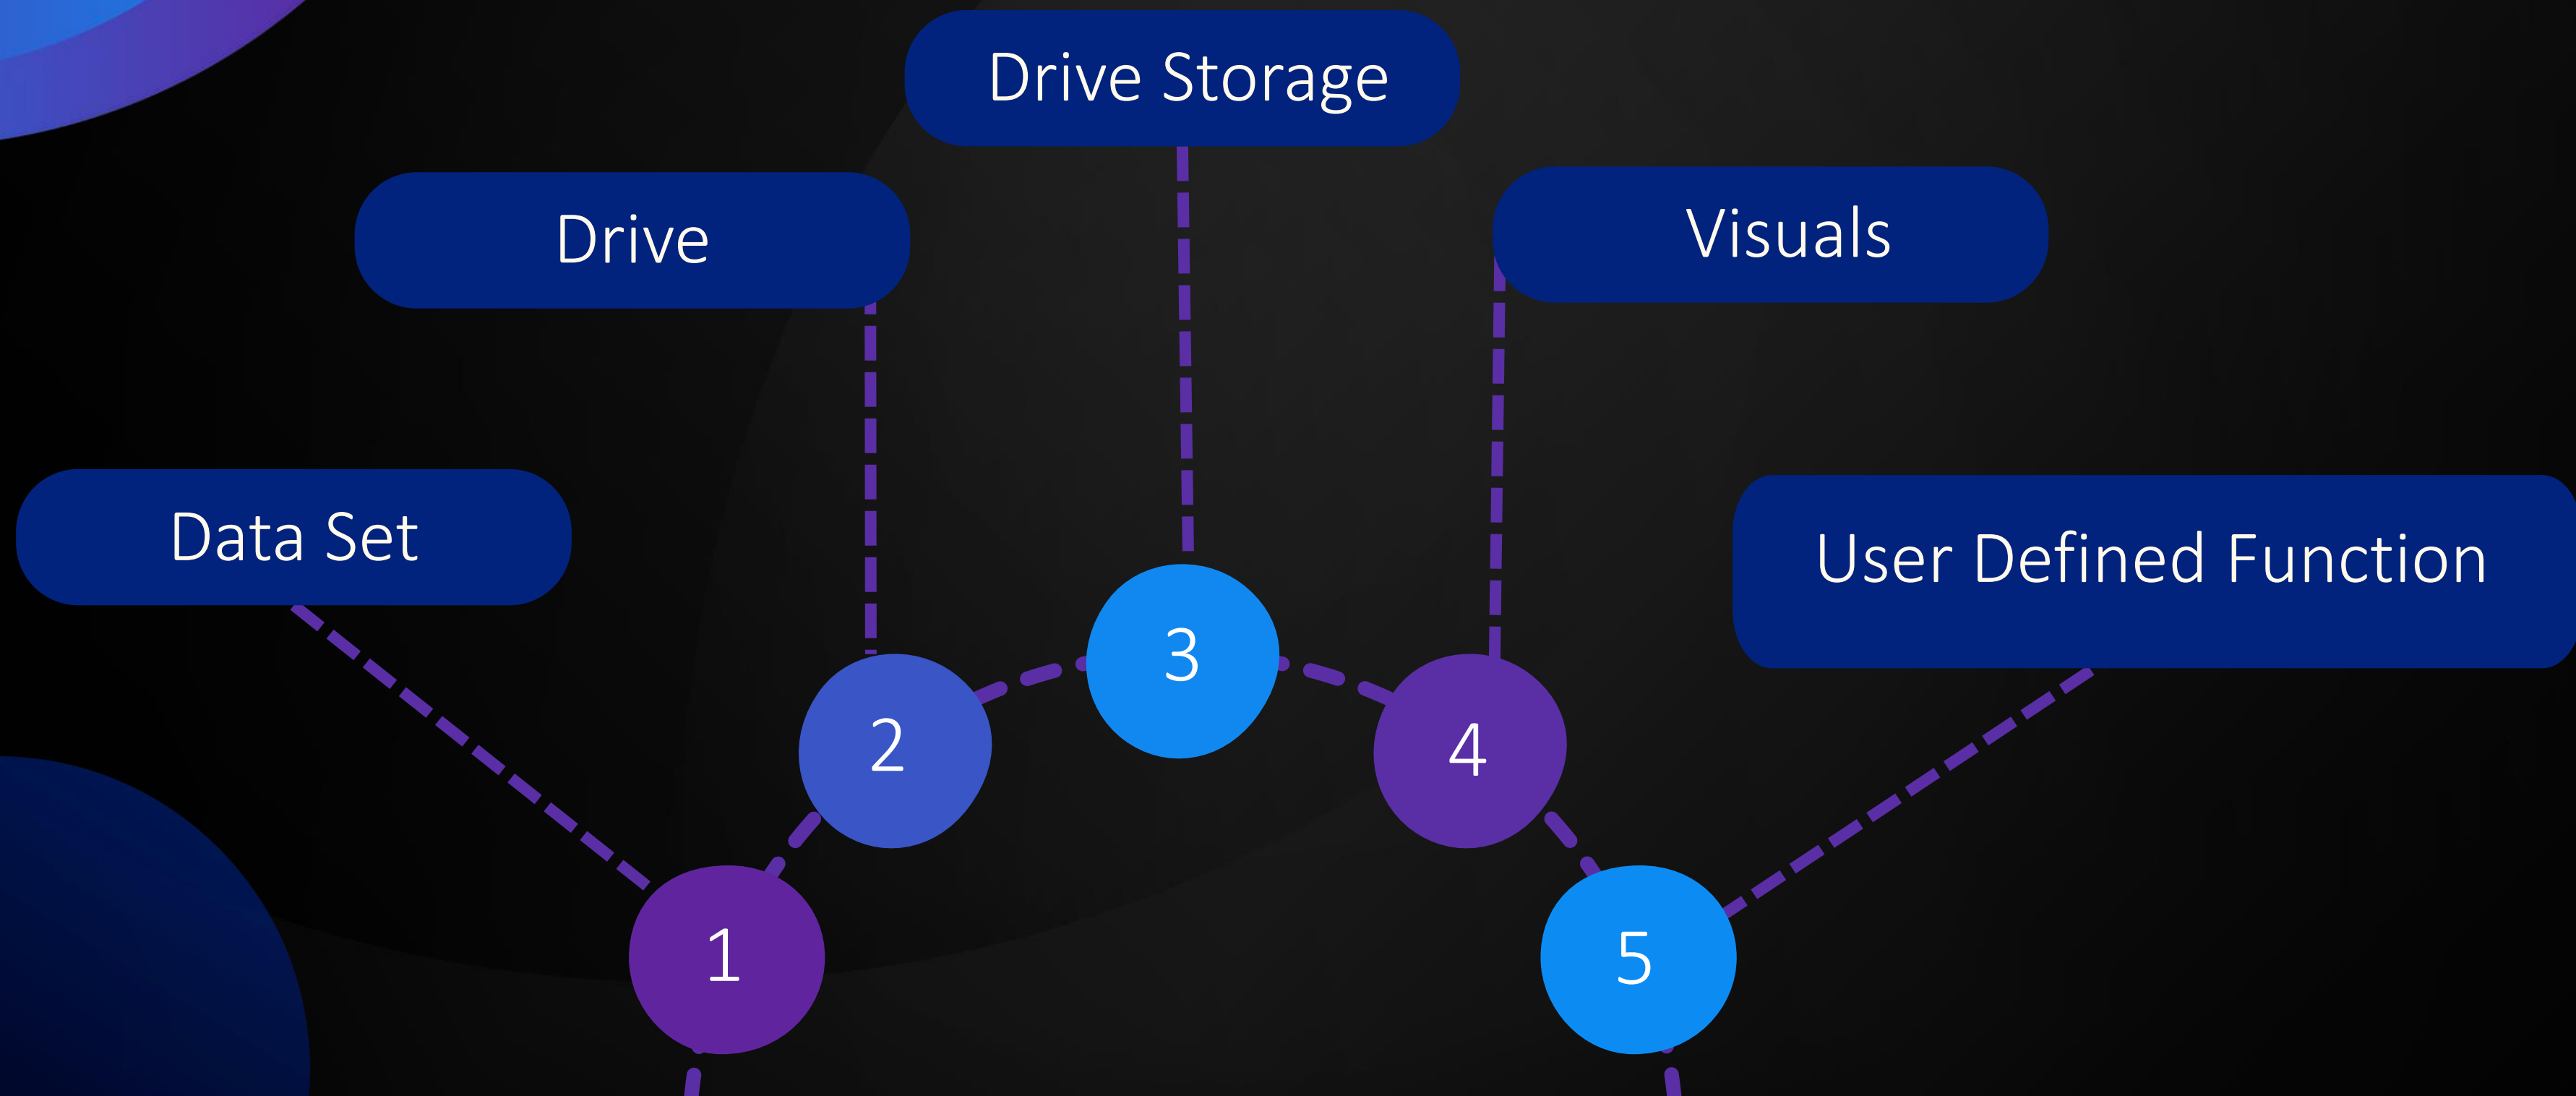

SOLUTION APPROACH

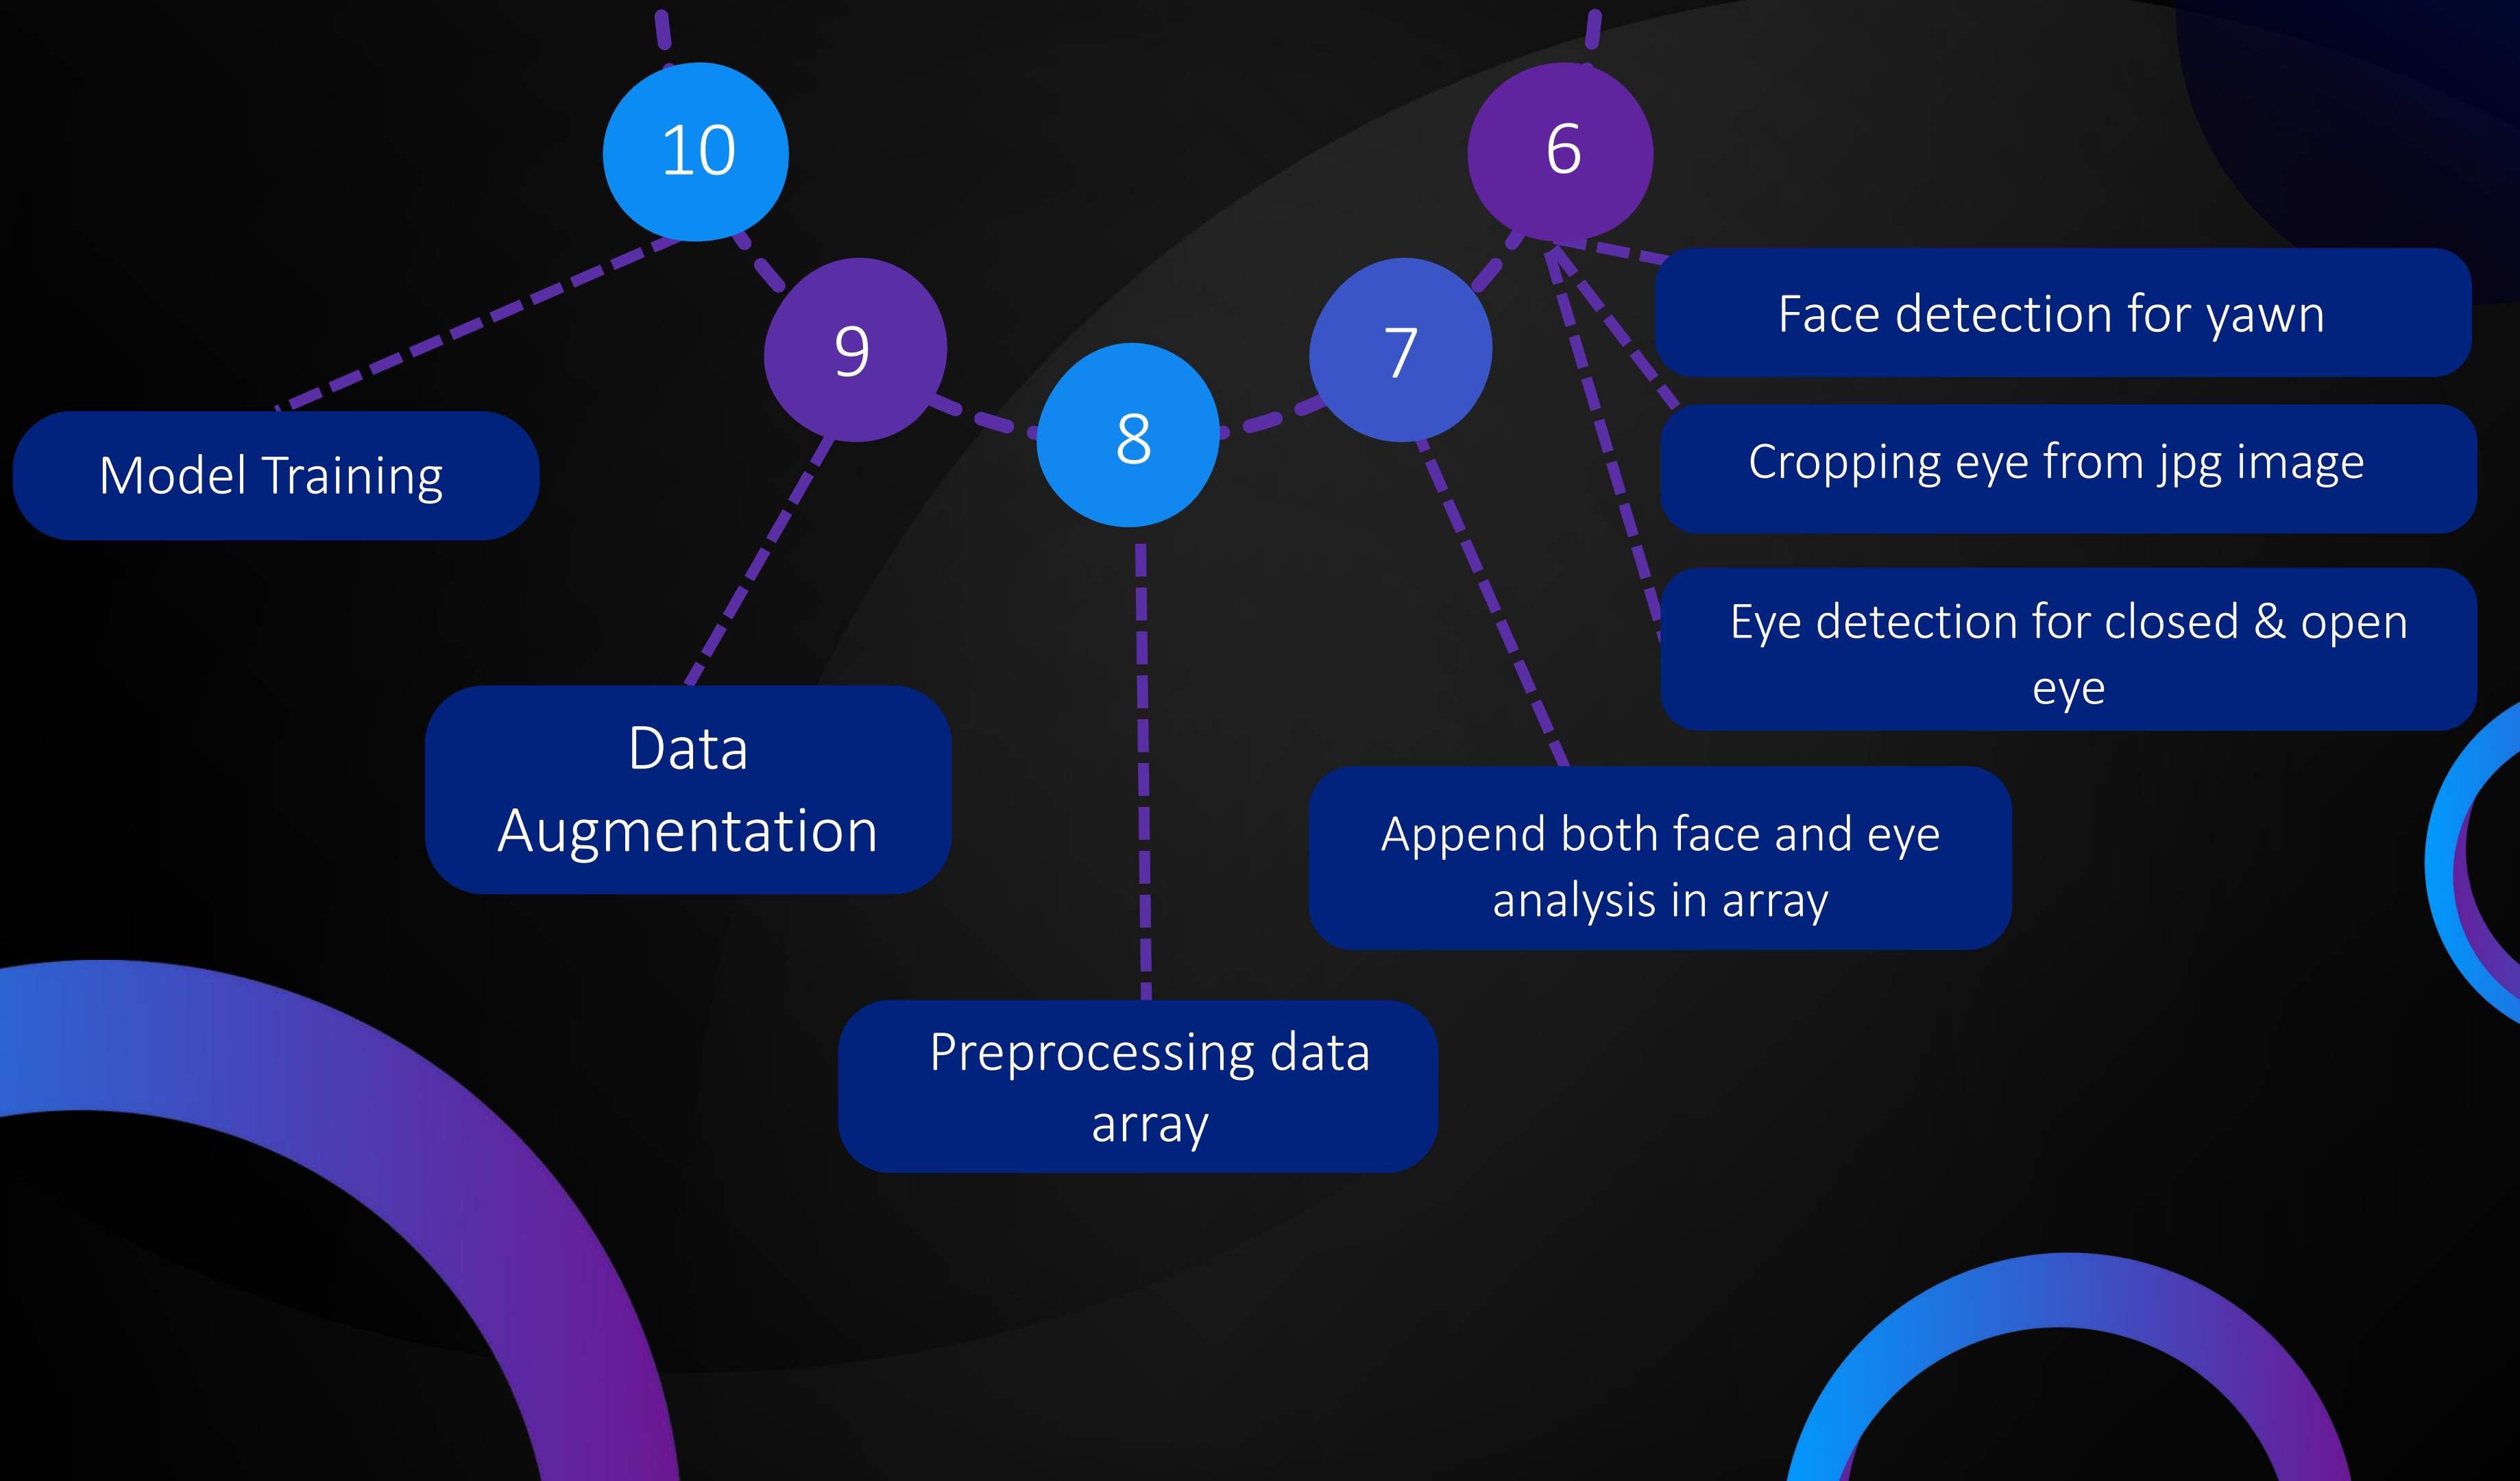

1. Real-time Monitoring and Alert System: Integrating the algorithm into the in-car camera system to enable real-time monitoring of the driver's facial expressions and eye movement System.
 2. Eye Tracking and Facial Expression Analysis: Analyze features such as drooping eyelids, changes in lip curvature, and overall facial muscle movements associated with drowsiness.
 3. Real-time Driver Assistance and Intervention: This will alert the driver and provide proactive interventions to prevent potential accidents.
- 

TECH STACK

- **OpenCV:** It is a powerful open-source computer vision and machine learning software library that can be used for tasks such as image and video analysis.
- **TensorFlow:** Libraries for building and training neural network models.
- **CNN:** It can process video frames in real time, allowing for continuous monitoring of the driver's facial expressions and eye movements.

ANALYSIS

- The model has higher accuracy and a lower loss rate.
- The predictions made are pretty accurate with lower error rates.
- The model is improving predictions over time.
- It is converging to a solution.

IMPLIMENTATION

```
... 1/1 [=====] - 0s 82ms/step  
Prediction : 3  
1/1 [=====] - 0s 20ms/step  
Prediction : 3  
1/1 [=====] - 0s 24ms/step  
Prediction : 3  
1/1 [=====] - 0s 18ms/step  
Prediction : 3  
1/1 [=====] - 0s 19ms/step  
Prediction : 3  
1/1 [=====] - 0s 22ms/step  
Prediction : 3  
1/1 [=====] - 0s 19ms/step  
Prediction : 3  
1/1 [=====] - 0s 30ms/step  
Prediction : 3  
1/1 [=====] - 0s 18ms/step  
Prediction : 3  
1/1 [=====] - 0s 18ms/step  
Prediction : 3  
1/1 [=====] - 0s 21ms/step  
Prediction : 3  
1/1 [=====] - 0s 21ms/step  
Prediction : 3  
1/1 [=====] - 0s 34ms/step  
Prediction : 3
